

FAST Protect

FAST Protect puts you in control of your FAST Debit and FAST Credit cards through your mobile device, making it easy to set alerts and manage your finances on the go.

Control Spending

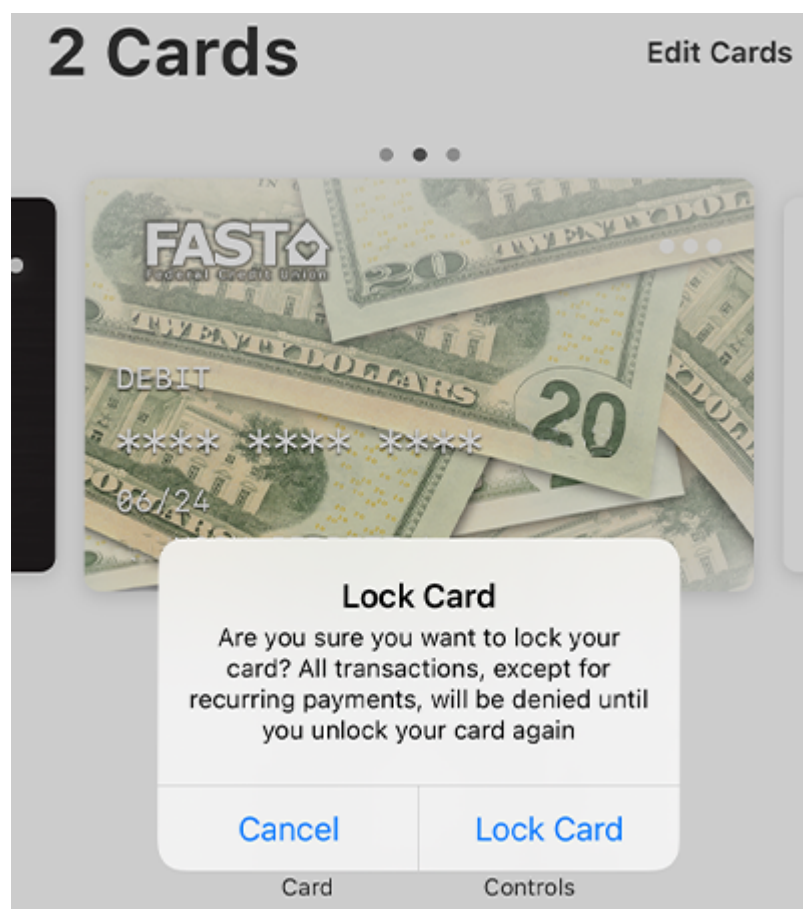

The screenshot shows the 'Spend Limit Controls' screen in the FAST Protect app. At the top, there is a back arrow on the left, the title 'Spend Limit Controls' in the center, and an 'Apply' button on the right. Below the title is a decorative banner featuring a close-up of a green banknote with the word 'Debit' visible. The main content area has a light gray background and contains the following elements: a toggle switch for 'Set limit per transaction' which is currently turned off; a text input field for 'Deny transactions exceeding:' with a dollar sign icon and the value '100.00'; and a disclaimer box at the bottom stating: 'Deny a purchase if the amount exceeds the limit set. A spend limit does not override the daily limits determined by your financial institution'.

If you're trying to establish or stick to a budget, FAST Protect can help. Set spending limits for general use or specify thresholds by merchant types, such as gas, groceries or retail stores. You can also establish these controls by location. The flexible app lets you change these parameters anytime with ease

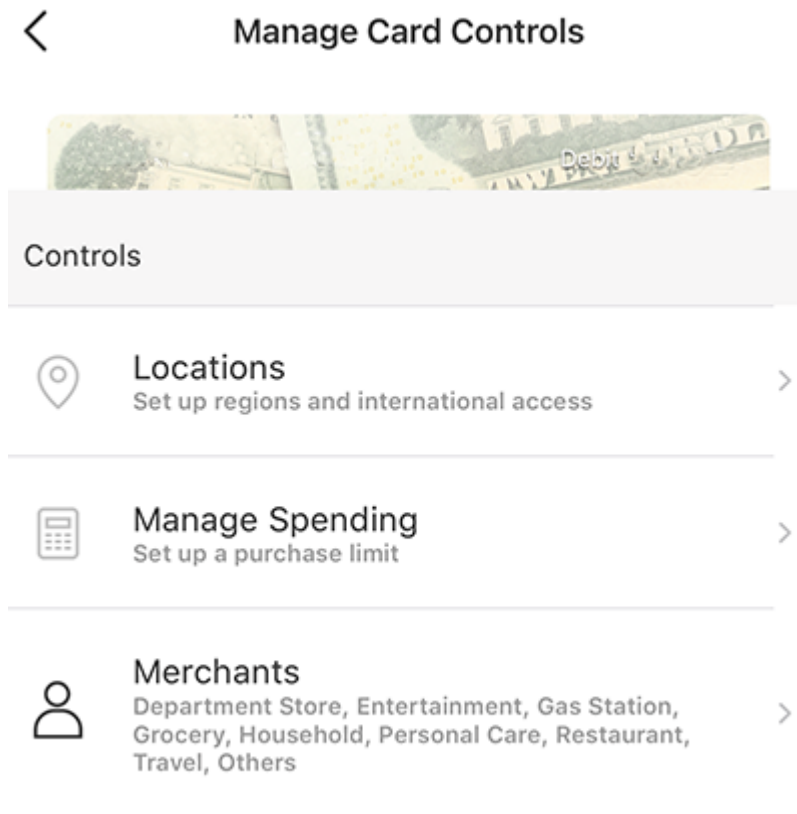

via your mobile device. Going on vacation? Holiday shopping? Simply update your transaction controls to fit your spending needs.

Guard Against Fraud

A lost or stolen card is just one area of concern in today's world where identity theft, skimming and other attacks are an unfortunate reality. Turning your FAST Debit and/or Credit card off when you're not using it helps safeguard against fraud. When your card is "off," no withdrawals or purchases will be approved. Transaction controls allowing your FAST card to work only in specific locations or geographic areas add another layer of protection. And real-time alerts keep you informed when your card is used or declined.

Protect Your Business

FAST Protect is a great tool for controlling business spending on a FAST Debit and/or Credit card. Use the transaction controls for merchant codes, location, and thresholds to ensure employee spending adheres to your company policies. Review balances and transactions, monitor your finances from anywhere and use our FAST Protect app to check account balances.

Note: Turning off your card is not a replacement for reporting your card lost or stolen. Contact us immediately if you believe unauthorized transactions have been made. Turning your card off will not stop card transactions presented as recurring transactions or the posting of refunds, reversals, or credit adjustments to your account. Any digital card numbers linked to the card will also be turned off. For debit cards, turning off your card will not stop transactions using other cards linked to your deposit account. For credit cards, turning off your card will turn off all cards associated with your credit card account. Availability may be affected by your mobile carrier's coverage area. Your mobile carrier's messaging and data rates may apply.
